Introduction

The document aims to generate a concise overview of the capabilities, settings and "Tips & Tricks" in MB-Diag.

MB-Diag is the name of the application developed by Mercedes-Benz Cars Netherland B.V. The purpose of the , on HTML bases technology, application is on the one hand to support the diagnosis process and on the other hand to check the work carried out in the workshop for quality.

The application contains 2 different functionalities. A Diagnosis app and a quality control app functionality.

What has the Diagnosis app has to offer?

- Quick overview from a glance.
- Mechanic's support during diagnosis, based on the technical training: Diagnosis Strategy.
- Readable diagnosis report.
- Audit proof.
- Adding files such as short tests, photos and video's is very easy.
- No more thick paper files.
- Deployable in feedback/explanation customer.
- Easier for warranty employee, especially on holding level.
- Easy search for an earlier case.

What has the Quality control app has to offer?

- Simple Quality control
- No list check, each check has a different questionnaire in a different order.
- Clear reporting
- Changing the number of questions, for example for different seasons

1.0 MB-Diag access

MB-Diag is an application that is based on HTML technology. This makes the site accessible online with any device, for example smartphones, tabs and computers. In addition, the advantage is that any "bugs" or improvements can be made faster without any approval from the Apple- and/or Playstore.

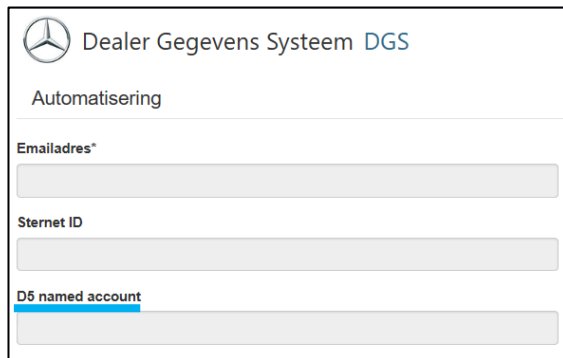

MB-Diag can be used on different devices at the same time within the same profile. In practice, the Diagnosis is completed with an Ipad during the work and files are added with the XENTRY Kit, without having to log in and out. However, it may be necessary to go out and in a case to make changes that have been made with another device visible.

MB-Diag can be reached at the following address: <https://MBDIAG.cloud.ecom.nl>

1.1 Registration for MB-Diag

In order to gain access to MB-Diag, the employee in question must be registered in both the Dealer Data System (DGS) and Global Training Netherlands (GTNL).

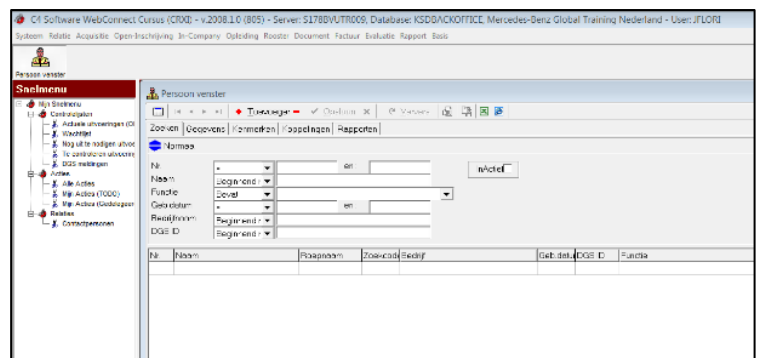

1. The first step is to register all employees within the Mercedes-Benz organization in the Dealer Data System. This is usually done by the various Human Resources departments within the holdings. This action is necessary for the publication of the relevant employee within Mercedes-Benz. An important point is the announcement of the employee within the DGS and linking of the employee D5-account.
2. The second step is register the employee within GTNL. This last registration determines the role of the user and thus the access and relevant functionalities within MB-Diag.
3. The third step is the upload. The upload is weekly done. In addition, new employees will be announced and employees who are no longer employed will be set to inactive. Inactive employee will be removed after a month. This way, the system is always up-to-date and information remains secure within the network.
4. The fourth and last step is a task for the foreman. Once the upload has taken place, the chef or service manager must generate a password for the employee. See also Password settings.

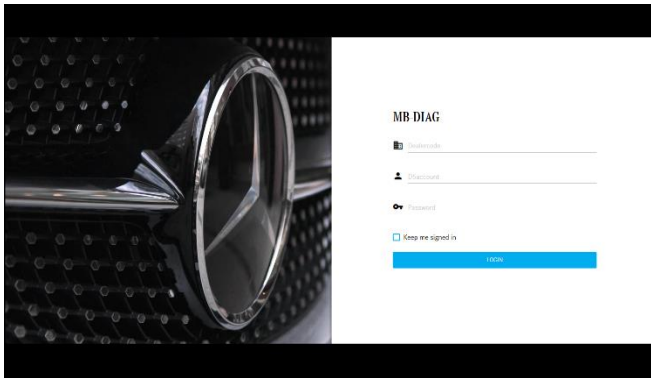

The screenshot shows the 'Dealer Gegevens Systeem DGS' interface. It has a Mercedes-Benz logo and the text 'Automatisering'. Below this, there are three input fields: 'Emailadres*', 'Sternet ID', and 'D5 named account'. The 'D5 named account' field is highlighted with a blue bar.

1. Register employee and D5 code within DGS.

2. Linking employee to function via Global Training NL.

The screenshot shows the 'Global Training NL' interface. It has a title bar with 'CT Software WebConnect, Cursus (CT00) - v.2008.1.0 (805) - Server: S1780/UTR009, Database: KSDACKOFFICE, Mercedes-Benz Global Training Nederland - User: JFL003'. Below the title bar, there is a 'Persoon verster' section with a 'Snelmenu' on the left and a main form on the right. The main form has fields for 'Naam', 'Functie', 'Geboortedatum', 'Rechts/links', and 'DGE ID'. There is also a 'Status' dropdown menu with 'actief' selected. At the bottom, there is a table with columns: 'Naam', 'Functie', 'Rechts/links', 'DGE ID', and 'Status'.

3. New employees will be announced and employees who are no longer employed will be set to inactive. After a month, inactive employees, will be removed.

2.0 Password settings

The password settings has 3 different options:

- 1 Generate password for new users.
- 2 Password reset for users.
- 3 Change user password.

2.1 Generate password for new users

FO | SM | ASM | LA | GA

When a user is first registered within MB-Diag after going through the steps, the user will be uploaded to MB-Diag. Once the new user is uploaded into the system, the foreman, Service Manager and After Sales Manager can generate a password for the new employee.

Local Administrators can change/reset the passwords nationally.
Global Administrators can change/reset the passwords globally.

2.2 Password reset for users

FO | SM | ASM | LA | GA

When a user has password problems, the foreman, service manager and after sales manager can reset the password. See the table below for all password functionalities.

The Role of the account that has to be reset

Active role		ME	SA	FO*	SM*	WH	QM	ASM*	LO	LA*	GO	GA*	MA
	Mechanic	X	X	X	X	X	X	X	X	X	X	X	X
	Service Advisor	X	X	X	X	X	X	X	X	X	X	X	X
	Foreman	✓	✓	✓	✓	✓	✓	✓	X	X	X	X	X
	Service Manager	✓	✓	✓	✓	✓	✓	✓	X	X	X	X	X
	Warranty Holding	X	X	X	X	X	X	X	X	X	X	X	X
	Quality Manager	X	X	X	X	X	X	X	X	X	X	X	X
	AS Manager	✓	✓	✓	✓	✓	✓	✓	X	X	X	X	X
	Local Observer	X	X	X	X	X	X	X	X	X	X	X	X
	Local Admin	✓	✓	✓	✓	✓	✓	✓	✓	✓	X	X	✓
	Global Observer	X	X	X	X	X	X	X	X	X	X	X	X
	Global Admin	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓
	Media	X	X	X	X	X	X	X	X	X	X	X	X

*Only other persons with the same role can reset passwords.

Local Administrators can change/reset the passwords nationally.
Global Administrators can change/reset the passwords globally.

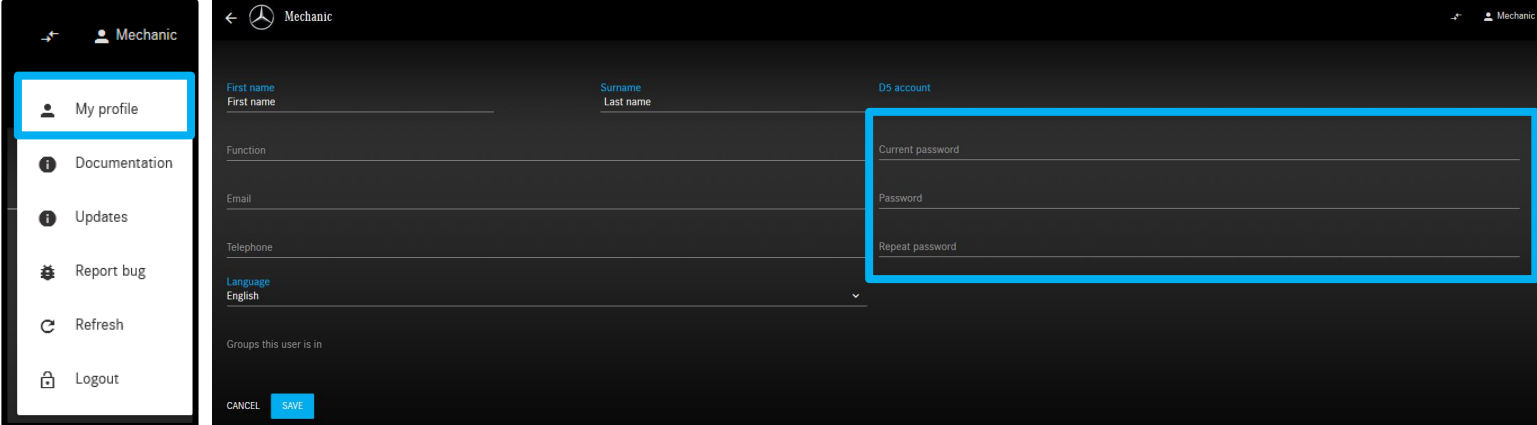

2.3 Change user password

Every user, except the user “media”, can change the password in their own profile.

Go to Menu, My Profile.

Enter the current password, and then the new password.

The user “media” needs to go to the national representative.

The screenshot displays the 'Mechanic' user profile page. On the left, a sidebar menu contains 'My profile', 'Documentation', 'Updates', 'Report bug', 'Refresh', and 'Logout'. The 'My profile' option is selected. The main content area is titled 'Mechanic' and contains several input fields: 'First name', 'Surname', 'D5 account', 'Function', 'Email', 'Telephone', 'Language' (set to English), and 'Groups this user is in'. A red rectangular box highlights the password change section, which includes three input fields: 'Current password', 'Password', and 'Repeat password'. At the bottom of the form, there are 'CANCEL' and 'SAVE' buttons.

3.0 Roles in MB-Diag

There are several roles in MB-Diag presence. The role determines which functionalities are visible within MB-Diag. See also "Registration for MB-Diag".

In the table below there is an overview of the various roles and functionality present:

Function		Diagnosis app		Quality control app				Settings			
MB-Diag role		Edit	View cases	Edit	View controls	Employee results	Target Tab	Questions regarding quality control	Assign temporary role	Manage groups	Set Quality goal
Mechanic	ME	✓	✓	-	-	-	-	-	-	-	-
Foreman	FO	✓	✓	✓	✓	✓	-	✓	✓	-	Location
Service Advisor	SA	ID-Tab	✓	-	-	-	-	-	-	-	-
Service Manager	SM	ID-Tab	✓	✓	✓	✓	-	✓	✓	Location	Location
Warranty holding	WH	-	✓	-	-	-	-	-	-	-	-
Quality manager	QM	-	-	✓	✓	-	✓	-	-	-	Holding view only
AS Manager	AS	-	✓	-	✓	✓	✓	-	✓	Holding	Holding
Local Observer	LO	-	✓	-	✓	-	-	-	-	-	-
Local Admin	LA	✓	✓	-	✓	✓	✓	✓	✓	National	National
Global Observer	GO	-	✓	-	✓	-	-	-	-	-	-
Global Admin	GA	✓	✓	-	✓	✓	✓	✓	✓	Global	Global

3.1 Temporary userrole

FO | SM | ASM

MB-Diag has the possibility to grant someone an extra role temporarily, for example holiday periods. The following 3 roles can set up a temporary replacement for a maximum period of 10 years:

- Foreman can assign a temporary foreman
- Service Manager can assign a temporary foreman and service manager
- After Sales Manager can assign a temporary after sales manager.

Temporary user role

User

Mechanic

User role

Temporary Foreman

Start date

June 5, 2020

End date

June 5, 2030

CANCEL

SAVE

- 1 Go in the upper right corner to Menu,
- 2 Select Temporary user role.
- 3 Select the user.
- 4 Select the desired period
- 5 Select Save.

By assigning the temporary user role, the desired user will have multiple functionalities available, as well as privacy sensitive information within the branch/holding company.

3.2 External user role

FO | SM | ASM | LA | GA

A number of locations work with temporary workers or often with colleagues from other locations. An employee can only be registered in one location. To use MB-Diag, these employees can use the external account, each location has 3 external accounts.

This account can be set up by the foreman and service manager. They can add a first- and last name and generate a password.

The password remains active. Change this regularly to avoid a security leak.

4.0 Diagnosis app

ME | SA | FO | SM | WH | ASM
LO | LA | GO | GA

MB-Diag Diagnosis app is only available for certain roles. Depending on the user role, the Diagnostic App functionality is opened immediately, or must be opened by selecting the "Diagnostic app" tile.

See table for functionality per user role

Function		Diagnosis app					
MB-Diag role		Available via	Open/Edit cases	View cases	Remove Onhand cases	Search tab	Reporting tab
Mechanic	ME	Directly	✓	✓	-	Search holding	-
Foreman	FO	Tile in mainscreen	✓	✓	✓	Search holding	Location

MB-Diag © 2020 ECOM Version 1.1.51 ABOUT

- 1 Active tab
- 2 Red: The diagnostic case is opened and ID-tab hasn't been fully filled in.
- 3 Green: Diagnostic case has been signed off by mechanic.
- 4 Orange: Diagnostic case is onhand.
- 5* Trashcan: Remove a diagnostic case. Only available for foreman, local- and global admin.
- 6 Generate a draft "Diagnosis" form.
- 7 There is a user at work in the diagnosis case.
- 8 Open a new diagnostic case.

4.1.1 Open a new diagnostic case

 ME | SA | FO | SM | LA | GA

To open a new diagnostic case, press the “+” button in the bottom right corner in the On Hand tab.

4.2 Diagnosis - Completed

Depending on the user role, the completed tab contains all completed diagnosis cases of one group, location, nationality or global.

The screenshot shows the 'Dashboard diagnosis' interface. At the top, there are tabs: 'ON HAND', 'COMPLETED' (active, marked with a blue circle 1), 'SEARCH', and 'REPORTING'. Below the tabs is a table with columns: 'WO No', 'Customer complaint', 'Mechanic', '#', 'License plate', 'VIN', 'Creationdate', and 'Completed'. There are two entries in the table, both with a green checkmark in the first column. The first entry has 'WO No' 1, 'Customer complaint' 'MB-Diag User Documentation', 'Mechanic' 'Mechanic', '#' 2, 'License plate' 'WDD1770441J167336', 'Creationdate' '06/25/2020', and 'Completed' '06/25/2020 09:05:57 AM'. The second entry has 'WO No' 1, 'Customer complaint' 'MB-Diag User Documentation', 'Mechanic' 'Mechanic', '#' 1, 'License plate' 'WDD1770441J167336', 'Creationdate' '06/25/2020', and 'Completed' '06/25/2020 09:04:53 AM'. A blue circle 2 is next to the second entry. At the bottom left, it says 'Showing 1 to 2 of 2 entries'. At the bottom right, there are navigation icons. The footer says 'MB-Diag © 2020 ECOM Version 1.1.52 ABOUT'.

WO No	Customer complaint	Mechanic	#	License plate	VIN	Creationdate	Completed
✓ 1	MB-Diag User Documentation	Mechanic	2	WDD1770441J167336	WDD1770441J167336	06/25/2020	06/25/2020 09:05:57 AM
✓ 1	MB-Diag User Documentation	Mechanic	1	WDD1770441J167336	WDD1770441J167336	06/25/2020	06/25/2020 09:04:53 AM

- 1 Active tab
- 2 Generate a "Diagnosis" form with or without attachments.

 Removing a completed diagnosis case is not possible.

4.3 Diagnosis - Search

In the search tab, you can search for a number of attributes within the diagnostic cases.

Conditions:

- Minimum entry is ≥ 2 characteristics.
- The search item must be known within the Holding.
- There will be no result from other holdings or within Mercedes-Benz AG.

Topics to search for:

- VIN
- Customer complaint
- Licenseplate
- Error code or/and description of errorcode

 Searches are carried out within the entire holding company. For example: If the holding company where you work contains 4 locations, searches are made within these 4 locations on the specified topics

 Searches aren't carried out within Mercedes-Benz AG platforms such as XENTRY TIPS and TIPS-cases.

4.4 Diagnosis - Reporting

The reporting tab can show four different types of info, depending of the user role:

- The foreman and service manager see the number of opened and completed diagnosis cases per month on their location.
- The after sales manager sees the number of opened and completed diagnosis cases per month for the holding.
- The local observer and -admin see the number of opened and completed diagnosis cases per month national.
- The global observer and -admin see the number of opened and completed diagnosis cases per month global.

- 1 Active tab
- 2 Filter results per groups, if available.
- 3 Filter on users
- 4 Results
- 5 See details and color differences.
Dark color is on hand diagnostic cases.
Light color is completed diagnostic cases.

4.5 Diagnosis - Content of tabs

This chapter gives a picture of the build-up of a diagnosis case. A diagnosis case contains the following tabs:

- 4.5.1 ID
- 4.5.2 Findings
- 4.5.3 Collect data
- 4.5.4 Diagnostic steps
- 4.5.5 Complete
- 4.5.6 Media
- 4.5.7 Extra
- 4.5.8 Close

4.5.1 ID-tab

- 1 The number tells the number of required fields for an audit proof case.
- 2 The required rule has been filled in. Note: The app doesn't check the filled in content.
- 3 The required rule has to been filled in to get the diagnosis case Audit proof.
- 4 The button shows the number of cases with the same VIN within the holding.
- 5 This button is only available when every required rule is filled in.
- 6 This button will give the option to copy the diagnostic case, in- or excluded test drives and short tests.

ID-Tab Fields:

Field	Required
WO Number	Y
Customer complaint number	Y
Repeat repair	Y
Intake	N
Customer complaint	Y
Complaint reproducible	Y
Milage	Y
Mechanic	N
License plate	N
VIN	Y

 The service advisor (SA) and service manager (SM) can only fill in the ID-tab.

 The user can use the next button to fill the next tab, but can also move directly to the next or other tab. The number of unfilled fields will then appear in red next to the tab name.

4.5.2 Findings-tab

- 1 Active tab
- 2 Execute a function check and indicate: good or not good
- 3 The required rule has to been filled in to get the diagnosis case Audit proof.
- 4 Do a test drive and log it completely
- 5 Do a visual check and make photos or video's

Finding Fields:

Field	Required
Emergency mode	Y
MIL on	Y
Function check	N
Complaint in words of mechanic	Y
Product feature	Y

By opening this tab, the diagnosis timer will start. See also Diagnosis timer.

4.5.3 Collect data-tab

1 - MB-Diag Guide

ID FINDINGS **COLLECT DATA** 1 DIAGNOSTIC STEPS COMPLETE MEDIA EXTRA CLOSE

✓ Intake protocol executed ☒ Yes ☐ No ☐ NA

✓ Voltage sustain ☒ Yes ☐ No ☐ NA

✓ Error code present ☒ Yes ☐ No ☐ NA

2 ✓ Error description P012800 3 MATCHING ERROR CODES: 3

✓ TIPS present ☒ Yes ☐ No

4 ✓ TIPS number description G120.10-P-059075 ✓ Tips version 6

✓ Provisional conclusion Cooling system polluted

NEXT >

- 1 Active tab
- 2 Give in every error code. MB-Diag will search for known cases within the holding with similar error code.
- 3 Number of error code matches.
- 4 Give in known TIPS-Documents with version number, conclusion and as an option; the time spent in minutes.

Collect data fields:

Field	Required
Intake protocol executed	Y
Voltage sustain	Y
Error code present	N
TIPS present	Y
Provisional conclusion	Y

4.5.4 Diagnostic steps-tab

- 1 Active tab
- 2 The fields entered in tab Collect data are listed here for an accurate overview.
- 3 In each step, the mechanic can enter the time spent for the warranty employee. This is especially practical by “ZM” times in ASRA.
- 4 Shifting rules for a chronological order.
- 4 Delete rules
- 5 Use pre-selected steps for faster entries
- 6 User has attached documents.
- 7 Delete steps

Diagnostic steps fields:

Field	Function
Test drive	Log a test drive
Short test	Insert an extra short test.
U - I - R	Insert measurements
Voltage measurement	
Voltage measurement with load	
Resistance measurement	
Current measurement (A)	
Scope measurement	
12V Battery test	
Visual check	Make photos or video's
Text	Insert text
WIS-Document	Make a reference to a WIS-Document
Extra TIPS-Document	Insert an extra TIPS-Document
TIPS-case	Collect all the fields in MB-Diag to create a TIPS-case more quickly and easily.

i When the mechanic has closed the diagnostic case, the tab Diagnostic steps can still be changed by both the mechanic and the foreman. When the foreman or manager signs off this is no longer possible.

ME | FO | LA | GA
SA | SM | WH | ASM | LO | GO

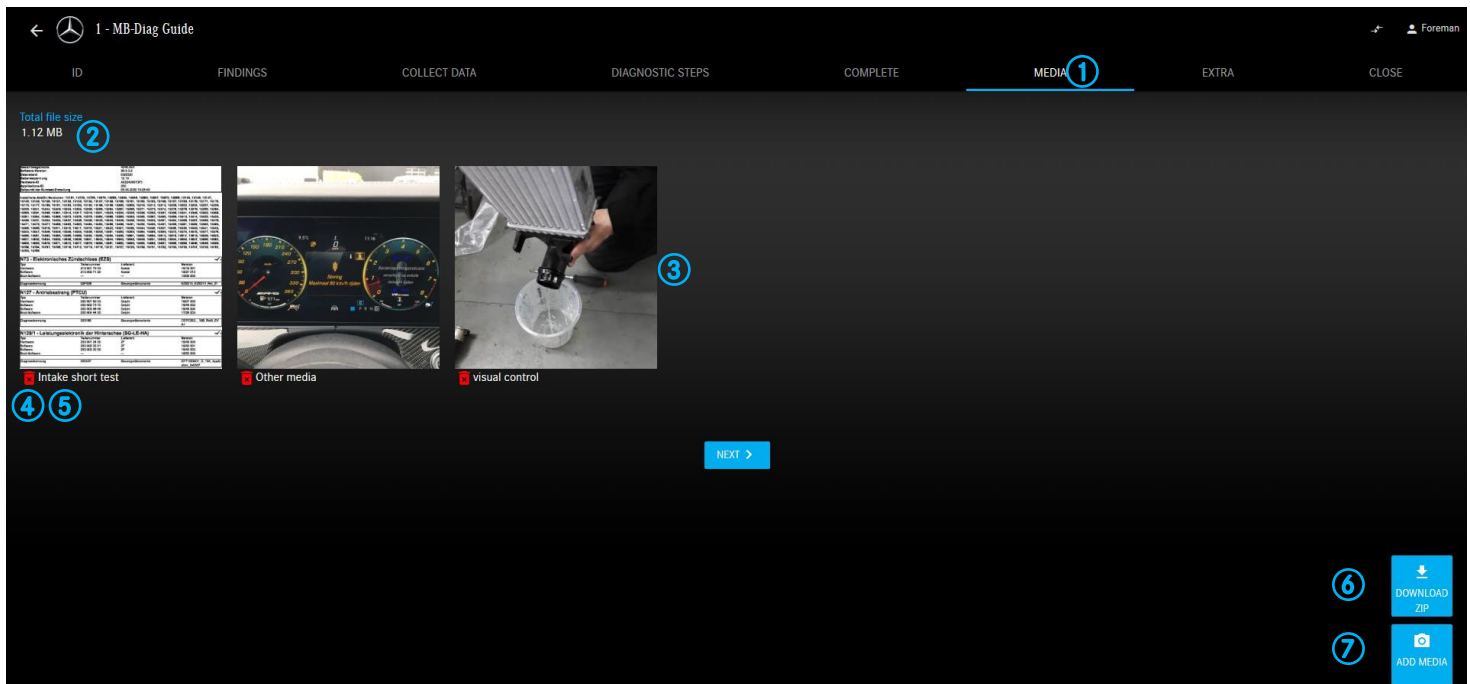

②

- ④

Field	required
Cause	Y
Solution / repair advice	Y
Wis-Document	Y
Exit Protocol	Y
Damage code	Option

The damage code can be a required field for the location. See settings for more info.

4.5.6 Media-tab

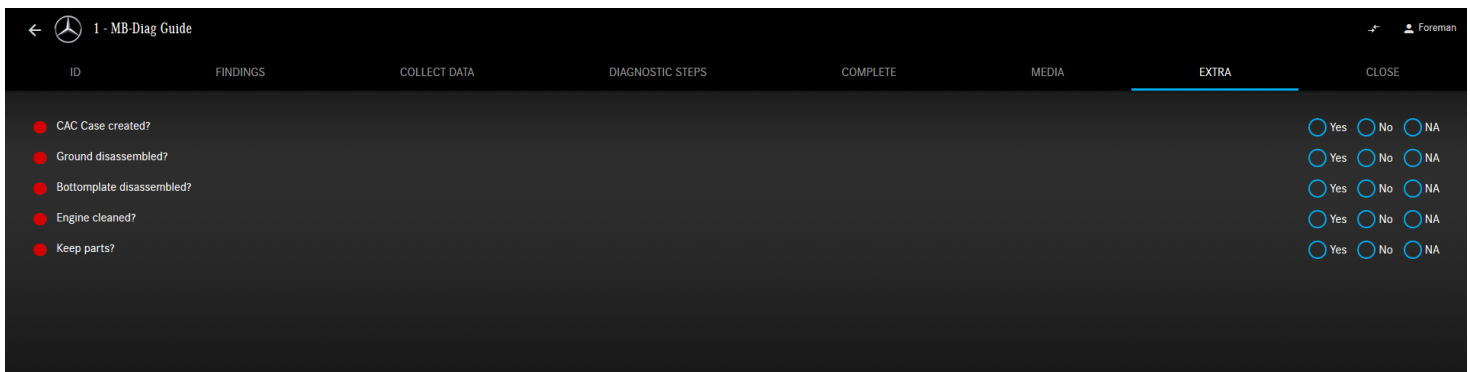

- 1 Active tab
- 2 The total file size.
- 3 Small Thumbnail of attachment.
- 4 Trash icon for removing attachments
- 5 Title of attachment
- 6 Download all files as ZIP. *Only available by attachments*
- 7 Add Media

i When the mechanic has closed the diagnostic case, the tab Diagnostic steps can still be changed by both the mechanic and the foreman. When the foreman or manager signs off this is no longer possible.

i Each attachment has a direct link. The user role Media can only see the attachment via that link.

4.5.6 Extra-tab

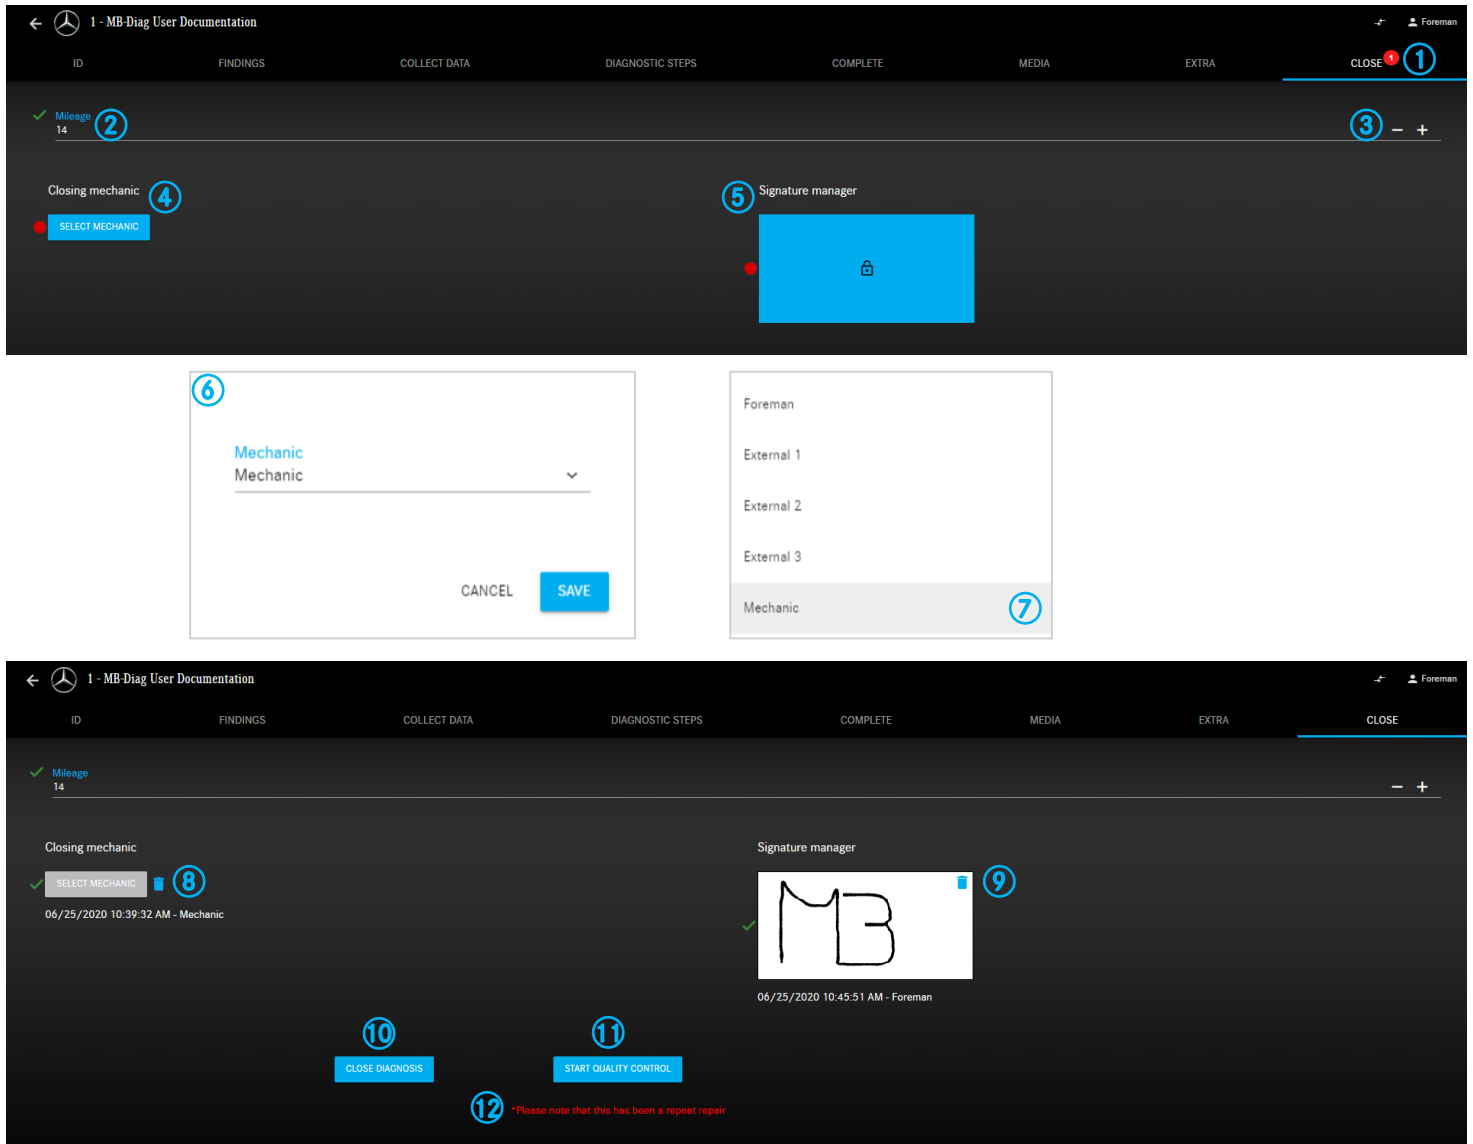

Fields	Required
CAC Case created	Y
Ground disassembled	Y
Bottom plate disassembled	Y
Front	
Middle	
Rear	
Engine cleaned	Y
Keep parts	Y

When the mechanic has closed the diagnostic case, the tab “Extra” can still be changed by both the mechanic and the foreman. When the foreman or manager signs off, this is no longer possible.

4.5.7 Complete-tab

- 1 Active tab
- 2 The outgoing mileage, Start + Test drive's.
- 3 Adjust outgoing mileage manually.
- 4 Mandatory field, mechanic has to signoff this diagnostic case.
- 5 The foreman has to signoff the diagnostic case.
- 6 Pop-up that opens while selecting mechanic
- 7 Choose mechanic from the list. *The list is compiled from the users of the location or group.*
- 8 Trashcan to remove the mechanic signature so the mechanic can change information in tabs. *Only available for foreman.*
- 9 Trashcan to remove the foreman signature. *Only available when the Close tab isn't closed.*
- 10 Close case and return to On hand page.
- 11 Start a Quality Control directly.
- 12 Reminder of a repeat repair. This indicates to start a Quality control for extra service.

Fields	Mandatory
Mileage	Y
Closing mechanic	Y
Signature Manager	Y

When the mechanic has closed the diagnostic case, the tab Diagnostic steps can still be changed by both the mechanic and the foreman. When other fields need to be changed, the signature of the mechanic must be removed.

When the foreman or manager signs off the diagnostic case and closes the screen, there are no changes possible.

4.6 Testdrive log

To make a testdrive log, select the test drive shortcut in Tab Findings or Diagnostic steps.

A good internet and GPS connection is required. Depending on the car, it is possible that signals can't enter the interior. Also make sure that the Location Services in combination with your browser are enabled.

- 8 Start a Quality control

5.1.1 Opening a Quality control

The following options are available to open a new Quality control:

5.1.2 Start a Quality control

Depending on how quality control is started, the following screens will be displayed

1 New quality control

Inspector **4** Foreman

WO number **5**

Mechanic **6**

License plate **7** Dutch license plates are matched with RDW data

VIN

2

Inspector Foreman

WO number 1

Mechanic Mechanic

License plate Dutch license plates are matched with RDW data

Brand MERCEDES-BENZ

Power 90

First admission 11/20/2018

Model CLA 180

APK 11/20/2022

Euro class 6

NEXT >

- 1 Quality control start screen after selecting the “+” sign in Onhand tab.
- 2 Quality control start screen from out diagnostic case. *All information is filled in from Diagnostic ID tab.*
- 3 Active tab.
- 4 The inspector is filled in due the logged in user.
- 5 WO Number has to be filled in.
- 6 Select mechanic.
- 7 Give in license plate.

By selecting the mechanic it is possible that names are orange. The orange color means: Compared to other mechanics, fewer checks are carried out.

6.4 Documentation

Under this Menu item the User documentation can be found.

6.5 Updates

Under this menu item all updates on the MB-Diag platform are registated.

6.6 Report Bug

Report a Bug to improve MB-Diag.

Try to give as much information as possible. Add Media to discribe the problem even better!

Frequently Asked Questions

1. User can't log in. The following message will appear:
"401 [MBD001] - Invalid D5account, password or dealercode".

Please check all data:

Is the Dealercode correct and does it have 4 digits?

Is the D5-Code correct?

Is the password correct? For help the Password can be made visible. Select the button:

If everything is correct, please reset the Users password. See chapter 2.2.

2. User can't log in. The following message will appear:
401 [MBD002] - Account has been deactivated.

For some reason the User is deactivated.

When this is not correct, go to chapter 6.2.4 to activate the user again.

After this, check all registrations of the user.

When there is no reason to deactivate the user, go to your national representative.

3. A new user wants to have access.

Registrations have to be made in Dealer Gegevens System and Global Training.
After all the registrations, the user will be uploaded after a week.

By problems, go to your national representative.

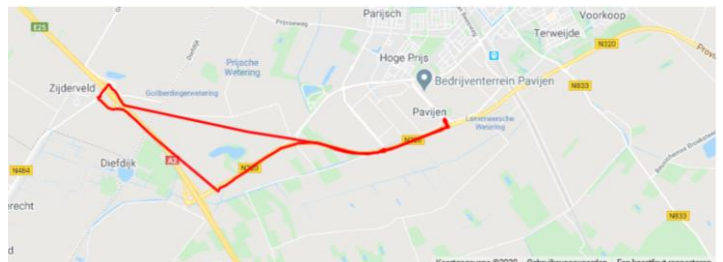

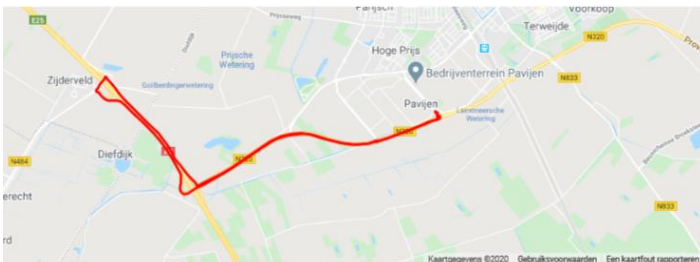

4. A new user is registered, but he/she can't log in.

Generate a password for the user, see chapter 2.1.

5. A user is going to leave our company, how does this work?

Every user is registered in Dealer Gegevens System. The HR department will sign out the user. By the next update the user will be deactivated and after a month the user will be deleted out of the system.

6. The testdrive log isn't good, what is the problem?

In most cases the GPS and internet connection is poor. You can improve the signal by placing the device on the dashboard or passenger seat. Also make sure that the Location Services in combination with your browser are enabled.

7. Where can I change the target of Quality controls?

You can set the target of Quality controls under My company, or when the location has groups, under groups. See also chapter 6.2.2.1.

8. Some users in the Quality Control are orange? What is the definition of the orange color?

By selecting the mechanic it is possible that names are orange. The orange color means: Compared to other mechanics, fewer checks are carried out.

9. Some options are not available, why not?

Depending on the userrole the user has less or more options. This all depends on the registration.

There are several options to change this:

The method of registration should be changed to the desired role.

The user can ask for a temporary userrole, see also chapter 3.1.
